

Quick rule: lower conventional oven temperature by 25°F.

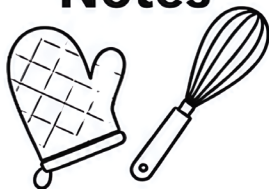

Air Fryer Temperature Conversion Chart

Suggested air fryer temperatures for common conventional oven settings.

Conventional Oven	Air Fryer
250°F	225°F
275°F	250°F
300°F	275°F
325°F	300°F
350°F	325°F
375°F	350°F
400°F	375°F
425°F	400°F
450°F	425°F

Helpful Notes

- Use the closest available setting if your air fryer lacks an exact temperature.
- Some air fryers max out at 400°F.
- Preheating may shorten cooking time.
- Check food early the first time you convert a recipe.
