ROMAN NUMERAL RULES

I = 1 V = 5 X = 10 L = 50 C = 100

- Roman numerals are read from left to right.
- When a smaller value appears before a larger value, subtract the smaller from the larger.
Example: IV = 5 - 1 = 4, IX = 10 - 1 = 9
- When a smaller value appears after a larger value, add the values.
Example: VI = 5 + 1 = 6, XI = 10 + 1 = 11
- Subtraction is only used with the following pairs:
 - I before V or X
 - X before L or C
 - C before D or M (beyond 100)
- Do not repeat a numeral more than three times in a row.
- Use the smallest number of numerals possible.

COMMON MISTAKES

- ✗ Using more than three repeats: IIII (should be IV)
- ✗ Invalid subtraction: IL (should be XLIX)
- ✗ Reversing subtraction order: VX (should be XV)
- ✗ Non-standard subtraction: IC (should be XCIX)
- ✗ Using too many numerals: VV (should be X)
